## PROFILE

I am a .NET Developer with 3 years of experience in building dynamic web applications. Skilled in C#, ASP.NET, MVC, and SQL Server, I focus on creating efficient, scalable, and secure solutions. I am passionate about continuous learning and delivering high-quality web applications.

- Experience in integrating third-party libraries and web services like Paytm.
- Experience in integrating third-party libraries like AWS.

## EDUCATION

2020 - 2022

POORNIMA UNIVERSITY

- Master of Computer Application

2017 - 2020

SAJJAN INTERNATIONAL COLLEGE

- Bachelor of Computer Applications

## WORK EXPERIENCE

2024 - PRESENT Rushkar Technology Pvt. Ltd  
Sr .NET Developer

### • Projects

#### 1. Streamline MD (AI Assist) - ChatGPT Integration

**Project Description :** Streamline MD is an advanced healthcare management platform designed to improve patient care through efficient data management and seamless communication between healthcare professionals. The platform includes various features such as appointment scheduling, patient records management, and data-driven insights. In this project, I was involved in integrating OpenAI's ChatGPT into the Streamline MD platform to enhance user interaction and provide real-time AI-assisted support And Get Patient Data.

**Responsibilities :** Database Design and Developing, Web Services, Unit testing, Development API and Admin View Side, Technical Design, Team lead

**Technology :** C#, Dot Net MVC, Database: SSMS

## LANGUAGES

- English: Intermediate
- Hindi: Fluent

## SKILLS

• **Domain (Web Application Developer) :** Web Application Development

• **Platform :** Windows

• **Programming Languages :** Asp Dot Net Core, SQL Server

• **Development Environment :** Visual Studio, SSMS

• **Source Control :** Source Tree, GIT, VS.

## 2 . LMCC

**Project Description :** LMCC is an advanced application designed to optimize manufacturing processes through real-time monitoring and analytics. The application offers features such as production scheduling, inventory management, performance tracking, and data visualization to enhance operational efficiency and reduce downtime.

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

---

## 3 . Case LDC (Account Application)

**Project Description :** Case LDC is an application developed for legal professionals to manage and compile legal documents efficiently. It includes features such as document template creation, case management, version control, and secure document sharing. The application aims to streamline legal workflows and improve accuracy in document handling.

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

---

## 4 . Beauty Book

**Project Description :** Beauty Book is a web-based application designed to streamline the appointment booking process for salons. The platform allows clients to book, reschedule, and cancel appointments with ease, providing real-time updates on staff availability. Key features include service selection, staff profiles, appointment reminders, and online payments. The application aims to enhance operational efficiency for salons and improve the overall customer experience by providing a convenient, accessible booking solution.

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

---

## 4 . Sports Arena Booking

**Project Description :** Sports Arena Booking is a web-based application designed to facilitate the online booking of sports grounds and facilities. The platform allows users to view available sports grounds, make reservations, and manage bookings with ease. It includes features such as real-time availability updates, booking management, payment processing, and user profiles. The goal of Sports Arena Booking is to streamline the booking process for sports facilities, improve access for users, and optimize the management of ground reservations.

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

## 5 . AI Scribe (Python API Call)

**Project Description :** AI Scribe is an intelligent documentation assistant that leverages AI to generate clinical notes, summaries, and reports based on structured and unstructured healthcare data. This project integrates with AI models via RESTful Python APIs to receive input from users (e.g., doctors or healthcare staff), process it through AI, and return well-structured summaries or transcripts in real-time. The system is designed to streamline clinical documentation, reduce manual effort, and enhance productivity in healthcare environments..

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

---

## 6 . CareNest

**Project Description :** CareNest is a comprehensive health and wellness management platform designed to facilitate seamless coordination between patients, caregivers, and healthcare providers. The application offers an all-in-one solution for managing medical appointments, monitoring vitals, storing health records, tracking medication schedules, and enabling real-time communication. The platform is especially tailored for elderly and long-term care patients, ensuring their health needs are met proactively.

**Responsibilities :** Developing, Web Database Services, Design Unit and testing, Development API and Admin View Side, Technical Design, Team lead.

**Technology :** Dot Net Core MVC, Dot Net Core Web Api, Database: MS SQL Server

**JAN 2023 - FEB 2024** Websys Infotech  
**Dot Net Developer**

- **Projects**

**1. WRMS ERP**

**Project Description :** The WRMS ERP (Websys Retail Management System ERP) is a specialized software solution developed to cater to the needs of retail and wholesale businesses, as well as for accounting purposes.

**Responsibilities :** Database Design and Developing, Unit testing, Development Desktop Admin View Side, Technical Design

**Technology :** VB Dot Net, Database: SSMS2019

**Framework:** Microsoft DoNet Framework(4.8)

---

**JUN 2022 - JAN 2023**

SOAR Technologies

**Full Stack Developer**

- **Projects**

**1. SOAR (Company Website)**

**Project Description :** The SOAR project involved the creation of a comprehensive and user friendly company website aimed at enhancing the company's online presence and engagement with potential clients and stakeholders. The website was designed to showcase the company's services, portfolio, and expertise in the industry while providing a seamless user experience. Key features of the website included a responsive design, interactive elements, a blog section, contact forms, and integration with social media platforms.

**Responsibilities :** Database Design and Developing, Web Services, Unit testing, Development API and Admin View Side, Technical Design

**Technology :** Angular14, Dot Net Core Api, Database: SSMS 2019

**Framework:** Microsoft DoNet Framework(7)

---

**JULY 2021 - SEPT2021**

Vebrin Infotech Pvt Ltd

**Laravel Developer(Internship)**
